IEEE – Supporting Sustainable Development

IEEE is the world's largest technical professional organization dedicated to advancing technology for the benefit of humanity.

Humanitarian Activities Committee

IEEE HAC supports strengthening the capacity and impact of IEEE volunteers involved in sustainable development and humanitarian technology related activities around the world. IEEE HAC facilitates necessary education and training, builds strategic partnerships, provides funding for projects and events and supports IEEE SIGHT activities.

For more about IEEE HAC: http://bit.ly/1UHpUq4

For more about our opportunities: www.ieee.org/doing-good

IEEE SIGHT

Special Interest Group on Humanitarian Technology

The IEEE SIGHT (Special Interest Group on Humanitarian Technology) Program facilitates collaboration between IEEE and non-IEEE volunteers to leverage technology for sustainable development. IEEE SIGHT members with complementary skills, expertise and experience partner with local communities and stakeholder groups to co-design solutions addressing local societal challenges.

For more about IEEE SIGHT: SIGHT.IEEE.org

Launched by UN Secretary-General Ban Ki-moon in August 2012, the Sustainable Development Solutions Network (SDSN) mobilizes scientific and technical expertise from academia, civil society, and the private sector in support of sustainable development problem solving at local, national, and global scales. We aim to accelerate joint learning and help to overcome the compartmentalization of technical and policy work by promoting integrated approaches to the interconnected economic, social, and environmental challenges confronting the world. The SDSN works closely with United Nations agencies, multilateral financing institutions, the private sector, and civil society. **unsdsn.org**

Association of the Master's in Development Practice (MDP) programs is a network of 38 MDP programs, each committed to a high-intensity program of teaching, research, innovation, and practice that involves all parts of the world. The Global Association arises from a shared commitment to forge a new profession of sustainable development practice that integrates the social sciences, natural sciences, health sciences and management. Intellectual foundational support was provided in the 2008 report of the International Commission on Education for Sustainable Development Practice, supported by the MacArthur Foundation. Numerous universities have or are in the process of designing, introducing, and promoting the new, cross-disciplinary global Master's in Development Practice program. In order to function effectively as the Global Association of the Master's in Development Practice, the Association is guided by bylaws that define its purpose and responsibilities. **mdpglobal.org**

The Earth Institute Columbia University

The Earth Institute's mission is to mobilize the sciences, education and public policy to achieve a sustainable Earth. Through interdisciplinary research among more than 500 scientists in diverse fields, the Institute is adding to the knowledge necessary for addressing the challenges of the 21st century and beyond. With more than two dozen associated degree curricula and a vibrant fellowship program, the Earth Institute is educating new leaders in the growing field of sustainable development. We work alongside governments, businesses, non-profit organizations and individuals to devise innovative strategies to protect the future of our planet. **earth.columbia.edu**

Center for Sustainable Development

EARTH INSTITUTE | COLUMBIA UNIVERSITY

The Center for Sustainable Development (CSD) mobilizes the scientific expertise of the Earth Institute to create tools and research that shape new solutions to the challenges of sustainable development, and to provide policy support – as requested by governments and development organizations – to address these challenges in the context of a global society. Weighing the individual needs of the countries in which we work, CSD creates the triple-bottom line impact that accounts for social, environmental and economic objectives. **csd.columbia.edu**
